Notes
1) "Output" input is 0V to +10V.
2) "PD In" input is:
   - Jumper up: amplified detector, 0V to +2.5V into 50 Ohms.
   - Jumper down: straight PD, 0mA to +1mA into 50 Ohms.
3) Audible alarm device has jumper so that other than +5V can be used.
4) Can add front end logarithmic amp to PD input, such as TI's L06114.
